

Entwined

Coal Chamber

Could we please shut our mouths for the while?
For only just a while I could take it
And if we could lay alone for the while
For only just a while I could take it You have made me alright complete again
Also to break down my will again
I intend to render my sensibilities have all gone mad
You tend to talk about the better things
Then let's move on to better things
I'm using all my sensibilities Would you please assume that face?
The one that you make at me
And if we could make love for the while
For only just a while, God, I need it, I need it You have made me alright complete again
Also to break down my will again
I intend to render my sensibilities have all gone wild
You tend to talk about the better things
Then let's move on to better things
I'm using all my sensibilities If we could get caught in the moments
Get caught in the moments
Our senses run dry
If we could get caught in the moments
Get caught in the moments
Our senses run dry I would sacrifice myself for you
I would sacrifice myself for you
If we could get caught in the moment
Get caught in the moments
Our senses run dry
If we could get caught in the moment
Get caught in the moments
Our senses run dry
If we could, and If we could
And if we could, and if we could If we could get caught in the moments
Get caught in the moments
Our senses run dry
If we could get caught in the moments
Get caught in the moments
Our senses run dry If we could get caught in the moments
Get caught in the moments
Our senses run dry
If we could get caught in the moments

Get caught in the moments
Our senses run dry
