

# Gonna Be Ok

Chris Rene

I learned to make 'em run like the R+everend  
But I never had a 9 milli or a mac 11  
I was enticed by the G life  
When I met them boys from the east side

Yeah making money in the street life  
You could get stunted drinking honey from the bee hive  
Made my way through the troubles sometimes  
You could say I always had something else on my mind

Yeah I've been all about that mean code  
When I was younger always look up to the hero  
Everyone else they liked Scarface, DeNiro  
They used used call me a weirdo

[Chorus: x4]

If you ever felt like your world is over  
Thought about just giving up  
Feeling like you're fucked up when you're sober  
And your best shot's not enough  
Have you ever thought about just ending  
Even toy with the curtain call  
I know how you feel right now my friend see,  
I've been backed on against the wall  
It's gonna be OK, hey hey

I remember I was rapping in the twilight saying  
It would be so nice living in the limelight  
It was 1999 right I never saw it coming  
Grinding hit me blindside  
Been so many years since I looked back  
I know that it's this music makes me look at my life  
In a different perspective to many studio sessions  
Got my music obsession without no musical lessons  
Learned to play punk rock listened to other lessons  
I was raised west side and used my mind as a weapon  
I got cracked a few times and I spat a few lines  
Ain't saying that it's cool just glad that I survived

[Chorus: x4]

[Repeat: x4]

Before this day is done  
And it falls down out the sun  
Just let me hear you say  
It's gonna be OK ,hey hey

[Chorus: x3]
