Sorry That I Cheated

Young L3x

I need good loving tonight, tonight
But youâ€™re not here to make things right
So imma call another one
(Imma call another one)
Imma call another one, yeah
Imma fuck another one, another one
Imma fuck another one, yeah
Imma call another one
Imma call another one

I might to creepin
(I might go creepin, yeah)
Because I need it
(Girl I need it, yeah)
Iâ€™m sorry that I cheated
(Sorry that I cheated, yeah, yeah)
Because I need it
Girl I need it
Girl I need it

Girl you know, you know why I called you
Girl you know, you know why I want you
Girl you know, you know why I called you
Girl you know, you know why I want you
Girl you know

I need good loving tonight, tonight
But youâ€™re not here to make things right, nah
So imma call another one, yeah, yeah
(So imma call another one)
Imma fuck another one, yeah
Imma fuck another one, yeah, yeah
Imma call another one, another one
Imma call another one

I might go creepin
(Might go creepin)
Because I need it
(Because I need it)
Iâ€™m sorry that I cheated

(Sorry that I cheated)
But girl I need it
But girl I need it

I might go creepin
(Might go creepin)
Because I need it
(Because I need it)
Iâ€™m sorry that I cheated
(Sorry that I cheated)
But girl I need it
But girl I need it, yeah

Lay down while you come through, come through
I called you over here cause I want you, want you, yeah
And my girl ainâ€™t gotta know
Only reason that you here is cause you fuckin close, yeah
So take your clothes off, take em
What you waitin for, huh?
You tryna get me caught? Huh? What?
You wanna get me caught? Uh, damn

Girl you know, you know why I called you
Girl you know, you know why I want you
Girl you know, you know why I called you
Girl you know, you know why I want you
Girl you know

I need good loving tonight, tonight
But youâ€™re not here to make things right, damn
So imma call another one, another one
Imma call another one, another one
Imma fuck another one, yeah
Imma fuck another one, yeah
Imma call another one, another one
Imma call another one, yeah
