

The Gentleman

Administrator

A walking nightmare, the incarnation of your worst fears
You shed tears when I come near and think about a new career
but your stuck here with the terror of the void
gainfully employed and I've enjoyed the way I've seen your team destroyed
Best check the minimap I'm coming to take lives
With limbs sharp as knives giving out free hugs and high fives
Here comes the tower dive I'll start it with a rupture and silence
and follow up with unbelievable violence
I own the battlefield I'll never yield no need for heals
You want to get to my carries? It's like a tapdance through a minefield
I'm hard like German steel and I got mass appeal
This hunger's so unreal and your team's looking like a five course meal
How bout we make a deal? You let this tower go
And I'll let you know in chat when it's safe to farm so you 'll look like a pro
We'll be at Baron though, feel free to try and show

I still need a stack and you seem like the perfect thing make me grow
Let me introduce myself I'm Cho'Gath the gentleman

I'm very pleased to meet you on the fields of justice once again
and every now and then I think about our very last encounter

When you proved to be the most exquisite man ever devoured
We've got you pushed back hard, can't even leave the Nexus

Minions pour in so fast that it feels like the stream is endless

This game's on life support, base totally defenseless

Time to retreat to fountain trying to stop us would be senseless

My stacks are maxed out, it's time to back out

I've got no doubt that this next fight is set to be full on rout

Your team is wiped out, my team is right stout

Your towers are all down so /ff cause it's lights out
Let me introduce myself I'm Cho'Gath the gentleman

I'm very pleased to meet you on the fields of justice once again
and every now and then I think about our very last encounter

When you proved to be the most exquisite man ever devoured
