

Dark Light

Beat Farmers

I can see a face when I'm dreamin' at night
Beckoning me with screamin' eyes
I feel a presence everywhere
I catch a glimpse but then there's no one there I see a dark light that I've seen before
A wishful sight and an open door
A wishful sight and a dream no more She caught my eye from across the room
Winked at me not a moment too soon
My friend was talking to me of death
Before I took another breath
I see a dark light that I've seen before
A wishful sight and an open door
A wishful sight and a dream no more
I played the game like I didn't care
She talked to me with the skin in her hair
The message sent that she carried inside
A pretty face and then the sailor dies I saw a what the, huh?!
