

# Close Encounters

## Bat for Lashes

Some say my lover is a pale green light  
He hovers high where the moon shines bright  
I feel him come to me in the dead of night  
And I go to the other side And when he lovingly takes my hand  
Pulls me close to a windswept land  
I can't make anybody else understand  
How I go to the other side You know that I'll love you till the stars don't shine  
You know that you'll always fill this heart of mine  
And I could never forget with time  
All our close encounters  
All our close encounters And on the other side, he's all around  
He is a starry beam that lays me down  
And we become a dream of time and sound  
When I go to the other side
