What If...? (with Chuck Schuldiner) [1996 Demos]

Control Denied

So there they stood
On a mountain, revealing their wisdom
While taking in all that earth had to give to them
And what it hid, secrets that shadows of time concealedWhat if when they saw burning stars?
They thought it was a gift from beyond far
Look close between the lines
Beyond what you believe to be real, are they just theories of time?What if when they saw burning stars?
They thought it was a gift from beyond farBehold the truth of yesterday
It holds the truth to set you free
From history some live their livesNot long ago we looked at power as just a vision
To shatter dark with just a beam of light
It might be worth to take a close look at infinityWhat if when they saw burning stars?
They thought it was a gift from beyond far
Look close between the lines
Beyond what you believe to be real, are they just theories of time?What if when they saw burning stars?
They thought it was a gift from beyond
