

Holy Knight

Freedom Call

In times of war we fight
Where spirits of vengeance collide
Paralyzed fear deep inside
Voices calling, "Raise your head and hail"
One step in mind, two for the fight
Across the fields of pain we march
Glory to the land Holy knight, guiding light
Give us hope and feel our desire
No more fear, no more pain
Save us, the human race, freedom
We stand up awaiting the dawn
By daylight the kingdom is born
Our fortune is to bury wars
Love and peace for all
One step in mind, two for the fight
A world in rage falls in decline
Leave it all behind Holy knight, guiding light
Give us hope and feel our desire
No more fear, no more pain
Save us, the human race, freedom
Holy knight, guiding light
Give us hope and feel our desire
No more fear, no more pain
Save us, the human race, freedom
Hear the forces calling
We will raise our head up high
Feel the forces roaring
They will ride across the sky
Hear the forces calling
We will raise our head up high
Feel the forces roaring
They will ride across the sky
Is it our reality
To live a life in agony?
Everything that we have done
Burned the place that we belong
Is it our reality
To live a life in agony?
Everything that we have done
Burned the place that we belong
Is it our reality
To live a life in agony?
Everything that we have done
Burned the place that we belong
Is it our reality
To live a life in agony?
Everything that we have done
Burned the place that we belong
Fall from grace, take us home
Face to face, pray till the end of time
