Talk to Me While I'm Listening

Nanci Griffith

Should have known that you were gone back in Germany
You told me in the dark while I was sleeping
Then you slept through the sunrise as it washed across your face
And all that I had heard were our heart beatingTalk to me while I'm listening now
While this love has a voice that we both can hear
Before you let it go greatest love I've ever known
Won't you please talk to me while I'm listening?Cannot find a place to put this love away
Or lose the thought of sunlight on your face
I thought I heard your voice say I love you today
But it was only the sound of my heart beatingTalk to me while I'm listening now
While this love has a voice that we both can hear
Before you let it go the greatest love I've ever known
Won't you please talk to me while I'm listening?How I wish that I could take us back to Germany
I would stay awake and you would talk to me
Yet for every drop of rain I hear there's bound to fall another tear
Upon this page of song of my heart achingTalk to me while I'm listening now
While this love has a voice that we both can hear
Before you let it go the greatest love I've ever known
Won't you please talk to me while I'm listening?Before you let it go this greatest love I've ever known
Won't you please talk to me while I'm listening?
Talk to me talk to me
