Technicolour

H.O.S.H. & HearThuG

Once upon a time my friends it feels like yesterday
I was living lonesome in a world of disarray
Everything was black and white,there wasn't even gray
And every morning waking up on Groundhog DayIt was all in monochrome,without the light,
Just like a silver screen you walked into my lifeYou taught the stars to light up what was dark
I found the light saturated in your charm
We kiss the sky and dance across rainbows
Now it's all in technicolor with youI lived in the blackest house with seven pure white cats
The bleak eyed look of every day hidden deep inside my hat
The notes on the piano now remind me of my past
And now you're here right by my side,I hope that we will lastIt was all in monochrome,without the light,
Just like a silver screen you walked into my lifeYou taught the stars to light up what was dark
I found the light saturated in your charm
We kiss the sky and dance across rainbows
Now it's all in technicolor with youYellow,orange,pink,green and blue
Let's paint the town,darling us two
You bring your pallet and I will sing the sub bar
We're just two birds of a featherYou taught the stars to light up what was dark
I found the light saturated in your charm
We kiss the sky and dance across rainbows
Now it's all in technicolor with youYou taught the stars to light up what was dark
I found the light saturated in your charm
We kiss the sky and dance across rainbows
Now it's all in technicolor with youNow it's all in technicolor with you
