Turn Around

David Ryan Harris

I am not a fool
Love did not make me dumb
So tonight I seek the truth
Am I still the only one?Baby just save face
And make me believe that when
You ask me for space
That it's not to fit someone else inI pray that when the sun goes down on everything you've done
Whoever's arms your sleeping in will warm you like the sun
I hope your dreams are peaceful, I hope your sleep is sound
And you are satisfied with what you found
When you finally turn aroundSugar, don't hold out
For if you don't love me still
It's the least that you could do
Baby, to let me find some one that willI pray that when the sun goes down on everything you've done
Whoever's arms your sleeping in will warm you like the sun
I hope your dreams are peaceful, and I hope your sleep is sound
And you are satisfied with what you foundTwenty years from now my love,
Long after all the tears have dried
Who'll be there in memory only
And who'll be by your side?Regret is a pill to spill
That never quite goes down
I pray that he is gentle and careful with your heart
That he touches you in ways that slowly pry your shell apart
So he can reach that part of you that truly is your core
And you have found in him more that you've been planning forI hope your dreams are peaceful, I hope your sleep is sound
And you are satisfied with what you found
When you finally turn around
Hey, hey hey hey
When you finally turn around
Hey, hey hey hey
When you finally turn around
Hey, hey hey hey
When you finaly turn around
When you finally
