Vanish In Our Sleep

Bootsy Collins

if I could take you away to a better day
oh how our love would turn out okay
and if you'll just listen to me we could vanish in our sleep
and together just you and me

If they could understand the position they put us in
if we can only be real about the way that we feel
if we could fly away to another time & space
we could love, we could love love in our own rejected way
If I could just do to you all of the good things to do
we could squeeze the very juice out of love...
And if that aint enough - ill set a fire to your funky stuff, woman and ill put the fire out with more love

Daddys got a real need for ya, I know you got a thang for me too
wherever whoever or whatever we gotta do what we gotta do...
We gonna keep on truckin, we ain't just standin on the verge, we gon give love all we can muster, everytime we get the urge

I'd like to to tell the world where to go if they don't like our show, I'd like to kiss this whole world goodbye...
And if ya just listen to me
we could vanish in our sleep
and together just you and me...

Hang around baby I got more to say...
Ooh! ooh baby
That's right give me

You really make me laugh baby, feels so good
Oh baby ya just make me feel so serious
and I used to be a practical joker...
Ooh!
Oh yea baby

If I could just do to you all of the good things too, we could squeeze the very juice out of love...
And if that aint enough ill set a fire to your funky stuff, woman and ill put the fire out with more love
if I could take you away to a better day oh how our love would turn out okay
(That's right baby)
and if you could just listen to me
we could vanish in our sleep
(you and me come home together baby, at the same time)

and together just you and me...
(We belong together baby)
You're like music to my ears
You're like water on a desert baby
And I'm so thirsty for ya
Give it here its mine! Give it here!
