

Fyh

Tgt

Been feeling like it ain't enough for you
Don't tell me that you let go of our flings
Or maybe there's another guy
Maybe I just ain't your type
So much for forever and a day But I know what you're liking very well
I know why you came around
And know what kept you here
But if this goes too far, gets out of hand
I know just what I gotta do
It's what I've always did I make you happy
I make you happy Now look me in the eyes and say you love me
You can't even pretend that you still care
Is it even worth me fighting?
Tell me, are you even trying?
'Cause I feel like nothing's there But I know what you're liking very well
I know why you came around
And know what kept you here
But if this goes too far, gets out of hand
I know just what I gotta do
It's what I've always did I make you happy
I make you happy Is it really worth me fighting?
'Cause I feel like no one cares But I know what you're liking very well
I know why you came around
And know what kept you here
But if this goes too far, gets out of hand
I know just what I gotta do
It's what I've always did I make you happy
I make you happy I make you happy
I make you happy
