

# Bad Wolf

## Inferni333

It followed us from place to place.  
The entirety of time and space.  
No matter where they lead the chase.  
Two words would show their face

I take the words, and scatter them across the world.  
To lead myself here.  
Everything comes to dust.  
All things die, this I trust,  
The Time War ends here.

An evil that, knows no bounds.  
Hidden so, they won't be found.  
In the dark they make no sounds.  
They slowly broke society down.

I take the words, and scatter them across the world.  
To lead myself here.  
Everything comes to dust.  
All things die, this I trust,  
The Time War ends here.

I am the Bad Wolf  
I can see, everything!  
All that is, all that was.  
All that ever could be,  
My head. Is killing me!

(I think you need a doctor)  
(Bad Wolf)
