Nerve

Duct Tape Mustache

Call it liberation or frustration
As it hits like a bomb
Tearing you apart as you're first in line
Entering the zoneWatch how it runs
A nerve wrecking resistance
Watch how it burns
A venomous script's getting formedYou've traveled a long way to get here
And now its waking you up
Waking you upWalk straight for a final solution
Walk straight, don't you be so cold
Walk straight with a clear resolution
I'll state my case and never turnWatch how it runs, watch how it burns
And it's all a deception
Break it and learn, there's no return
For a presence like mineYou've traveled a long way to get here
It's getting all so clear now all the things at least
An elapse of conscious progress will last forevermoreMy courageous insanity follows an infinite time
I'll be attaching the world on my shoulders
Without a look inside
InsideWalk straight for a final solution
Walk straight, don't you be so cold
Walk straight with a clear resolution
I'll state my case and never turnWalk straight for a final solution
Walk straight, don't you be so cold
Walk straight with a clear resolution
