River's Edge/Strip the Flesh

Genitorturers

Say you wanna make it the nighttime's deadly stare
Never ever dreamed I'd deliver such a deep forbidden lair
Tempt you take it, I'll take you for a ride
Forever down by the river where I'll breath you deep inside
Say push...Say push it in...Say push...Say push it...in
There is no pain without my name, there is no pain without my name
There is no pain at all
Strip! In a fever lick my carcass
I need to rape your shattered bones
In a fever you were taken from my bed
I need to suck you in!
My severed sore, you were a victim of my pain within
Tormented twin, my pain within
To live without your presence is but a sin
Because I need your pain, I need your pumping brain
I need to break you
Ripping...Tearing...I need to strip the flesh
