

Forever Young

[Chris Isaak](#)

I knew the first time we met, we'd be lovers
The last time we kissed, I was blue
The first time you left, I discovered
That there won't be another like you
Forever young
Love will always be
Forever young
Love will always be, heh
Every day you were gone, I was lonely
Each night you were gone, I was blue
Now, darlin', I'll be with you only
And our love will always be true
Forever young
Love will always be
Forever young
Our love will always be
And to the end I know
That I will love only you
I knew, first time we met, we'd be lovers
The last time we kissed, I was blue
First time you left, I discovered
That there won't be another like you
Forever young
Love will always be
Forever young
Love will always be, heh
