

Let The Night (Dualistic Remix)

Dirty Vegas

Take a look at yourself
You're going somewhere
Such a beautiful thing
And it feels right
No, it's never too late
To believe in something
And open your eyes

See what the world is saying You should see how good you look right now
You should see how good you look right now Let the night, let the night, let the night, let the night

Follow you

Let the night, let the night, let the night, let the night

Follow you

Take another deep breath
Look at your reflection
You're a beautiful thing
And it feels right Give a little bit more
Try a little bit harder
Can do anything

Hear what the world is saying You should see how good you look right now
You should see how good you look right now Let the night, let the night, let the night, let the night

Follow you

Let the night, let the night, let the night, let the night

Follow you Take another deep breath

Look at your reflection
You're a beautiful thing
And it feels right
Give a little bit more
Try a little bit harder
Can do anything

Hear what the world is saying You should see how good you look right now
You should see how good you look right now Let the night, let the night, let the night, let the night

Follow you

Let the night, let the night, let the night, let the night

Follow you Let the night, let the night, let the night, let the night

Follow you

Let the night, let the night, let the night, let the night

Follow you
