Pre-Ignition

Voivod

Hey you Tell me, what's your call name Closed negative display Engaged on section three The acrid factories YouPutrid perfect product Proper platinum parts Proficient prototypes Steadily spew from these pipes Are youGenerated by waste Arid quarry displaced Environmental squeeze Aluminum disease YouConscious of origin Intent is in the wind Atmosphere infected Descendants defected Are youNovel stroke of design Or relics from this mine Casually choke Noxious nourishment Embodied illicit cure Ground and rock and sand Come crumble tumble down Grinding round The hydraulic wheel Extraction The ultimate greed Now...hidden from view Surveying stable shifts A feeble groove Unintentional split Then they return to work As if they're not disturbed Cybernetic beings Omniscent regiment Thriving with vigor Incessant loomAn assumed order Auspicious tool

Franticly flow
Spumous sediment
Remedied, neurotic fuse
Ground and rock and sand
Come crumble tumble down
Yonder sound an echoing gong
Disjunction
Of their disowned gods
Now...some are set free
Emotions flood their gaze
Synthetic breed
The pre-ignition phasePre-ignition
Flares up in you
Pre-ignition
Provokes me too
