

My Generation

Total Chaos

Our generation is raving mad
Your generation is fucking sad
Our generation is for the working class
Your generation is kicking ass
We're going to fight to free ourselves
From a system that can't relate
From a system that will not change
From a system that's fucking lame
From a system that's gone insane
Our generation is fucking pissed
Your generation won't be missed
Our generation is going to kick your ass
Your generation is part of the past
