

Controlled Elite

Dehumanized

2012 was at its core a simpler time when humanity was the dominant species

Man on man war was so innocent

Flesh was so magnificent

A.I. still remained on a leash

Reproduction went without guidelines

Not being computerized

Put into file size

Plastic surgery

So primitive now

Humans bit the hand that controlled them

Such arrogance with technology

Witnesses birthed the worst invention

Introduced nanotechnology

Microchips, injected

For their convenient safety

Meat puppets

Stood no chance

Virus spread infecting safely

Brains were fused

Database

Instant message

Submission

Once the first was utilized

Downloads then were next to find

Visionaries' dreams were misconstrued

Breathing apps are bought online

The mind is shared

The eyes are key

Motorskills

Are obsolete

Yek era seye eht

Slliksrotom

etetlosbo

The brain is shared

Homo-Sentience, Sentience

Looking back on 2012

Knowing what is known now

Apocalypse would've saved them

From giving their heart

Solo: Nagasawa
