

Show You the World

The Alternate Routes

Open up your eyes the sky will tell you what there is to see,
Let's wake up in a brand new place, shake up everything we believe.
Is it possible it's more beautiful than we dreamed?
Is it possible it was all right here this whole time within our reach? Let me show you the world,
Come away with me.
'Til you've seen for yourself, every mystery.
We'll learn every secret and turn every stone,
'Til there's no place we've been to that we can't call home. Let me show you the world,
Come away with me.
The light of day is reaching out, who'd of known we'd end up here.
Friends we'd never knew we had and some we've known and loved for years.
Is it possible it's more beautiful than we dreamed?
Is it possible it was all right here this whole time, within our reach?
Let me show you the world,
Come away with me. 'Til you've seen for yourself, every mystery.
We'll learn every secret and turn every stone,
'Til there's no place we've been to that we can't call home.
