One

Fates Warning

Under the spotlight
I feel our world's becoming one
Around me I feel
Everything we are, everything we see
I'll take a part of you
You take a part of meKnowing at a glance
Where we all stand
Searching for another chance
To make us all oneAbove the staring eyes
I sense that you and I are one
Knowing, showing
Everything we are, everything we see
I'll take a part of you
You take a part of meKnowing at a glance
Where we all stand
Searching for another chance
To make us all oneNow I know, we are one now
Now I know, we are one now
Now I know, we are one now
Now I know, we are one nowAfter the fading lights
I felt that we were one
I know I need
Everything we are, everything we see
I took a part of you
You took a part of meKnowing at a glance
Where we all stand
Searching for another chance
To make us all one
