

# Break The Curse

## Iron Savior

Another wasted night ahead  
Another wasted day  
Stuck in a dead end  
With a monster in your head  
Feeding on your energy  
Taking over control  
Makes you obey  
Spilling poison to the soul  
In dull submission  
You won't track down its hide  
It's the indifference  
That made you blind Break the curse  
Time is running short  
Shorter than you think  
Break the curse From very deep inside your mind  
A voice is calling you  
Saying:  
There's gotta be more to life than you know Shake off the routine from your mind  
And leave the treadmill far behind Break the curse...  
Break it up Don't let the demon of conformity  
Destroy it all  
What's still there waiting to be free Go kill the monster in your head  
You gotta gotta gotta  
Burn down the treadmill  
And move straight ahead Break the curse... Stand up and raise your fist up high  
And make two fingers pointing to the sky
