Dont Go
Calvin Richardson
(Speaking)
In the mist of the pouring rain
All malekeum misfits of the atmosphere are purified
Like all the hurt and pains of life strains
Are removed from the body of a beautiful woman
Through every tear held back that she dont cry
Your eyes like heavens windowpane
With the strength of an athlete
With a touch so gently
Brought mighty mighty Hercules to his knees
God told Adams no
Eve made him say; yes, yes
Her smell so sweet
Her body waves so unique
Makes a man complete
Surely Ill eat for just one more taste of your nectar
Please dont leave
Verse
Whats the problem now girl
Thought you said youd be with me from now
Through thick and thin
And I took your word girl
Are you contemplating leaving me (say no) aah no
Your love is like the petals of a rose (dont go)
Insecurities get the hell away from me (yea, yeah) pleaseeeee (dont go)
Chorus
I just wanna praise you
Let me take you to Jamaica girl (dont go) just dont go

I hope these feelings are contagious
Thank God everyday he made you girl (just dont go)
My world would be incomplete babe
If he took you from me baby (dont go)
No, no, nooo (umm hum)
Verse
Ill do anything to see you smile (ooh ooh)
Sunday morning Ill be
Making silly faces up in church
Till the preacher kicks me out (just to see you smile)
Guess what Im trying to say is
Ill be a clown (woo huh)
So you dont ever have to think about our love
Baby you can trust
When everything around us falls down
Standing it is us
Still love (na na na na)
Chorus
I just wanna praise you
Let me take you to Jamaica girl (dont go) just dont go
I hope these feelings are contagious
Thank God everyday he made you girl (dont go) dont go
My life would be incomplete babe
If he took you from me baby (dont go) dont go
No, no, nooo (umm hum)
I just wanna praise you
Let me take you to Jamaica girl (dont go) just dont go
I hope these feelings are contagious
Thank God everyday he made you girl (dont go) dont go
My world would be incomplete babe
If he took you from me baby (dont go) dont go
No, no, nooo (umm hum)
