

# Let the Sun Fall Down

[Kim Richey](#)

Close the door and leave the world behind you  
Open the window and listen to the breeze blow through the pines  
Take a deep breath, what more can you do  
Let the sun fall down all around you  
Let the night surround you in a blanket of starlight  
I'll whisper you a lullaby, let the sun fall down  
That old dark cloud acts like he knows you  
He takes up too much time, time you could be spending, holding me  
But he can't have you now, it's you and me here in this room  
Oh, oh, let the sun fall down all around you  
Let the night surround you in a blanket of starlight  
I'll whisper you a lullaby, let the sun fall down  
World will keep on turning  
It'll all be there, come morning  
So tonight  
Let the sun fall down all around you  
Let the night surround you in a blanket of starlight  
I'll whisper you a lullaby  
Oh, oh let the sun fall down all around you  
Let the night surround you in a blanket of starlight  
I'll whisper you a lullaby, let the sun fall down
