

# Does Anybody Out There Even Care

[Lenny Kravitz](#)

The dream is lost  
Don't let it slip away  
Or bloody days won't be far away  
'Cause when there's no more sun  
There's no where you can run Does anybody know how many lives we've lost  
Can anybody ever pay the cost  
What will it take for us to join in peace my friends  
Does anybody out there even care Wake up world before it's too late  
It's time for love to conquer hate  
And when the battle's won  
We all can live as one Does anybody know how many lives we've lost  
Can anybody ever pay the cost  
What will it take for us to join in peace my friends  
Does anybody out there even care Hey  
Riots in the streets,  
Men dressed in white sheets  
Is that what we want  
Oh a little boy hanging from a tree  
And a burning cross  
If we can learn that we're one we can overcome  
Before this takes us all  
We'd better catch ourselves before we fall Does anybody know how many lives we've lost  
Yeah hey hey hey  
Can anybody ever pay the cost  
What will it take for us to join in peace my friends  
Does anybody out there even care  
Does anybody out there even care
