

Left Field

B.o.B

[Dell]Dell, murderous whirlwind of wit
get the worst of it, break it down bit by bit
Hit a nerve? my graphics cause seizures you slur, and your memory blurs
A sure bet; Dell
It never fails clever tells the perilous quest
with the terrorist , sending MC's to the therapist
my microphone will be a family heirloom,
Doom awaits irate rappers dominate rappers 'till they scared straight after
I clap a track with exactlin flows that attract ???? (b-chords?, REcords??)
My thoughts to rappers like smores that cause puke
I duke newcomers and those who slumber (Ha Ha Ha)
Im under ones who's mostly dedicated to the leading of previous tedious trauma for honour and valour
Use the mileage A flavor fiddles with my pallet
If you know I can't allow it
Bow if you recognize royalty
My motor skills is more like a well oiled machine
any team that we construct we'll blow your dreams up in flames
names all evaporated when my powers activated, have to make it funky
Think that you dunk me or dip me lift me, why'd you have to pick me, we on point strictly
Strippin' brothers of their props
When I rock any facility with artillery, like Attila
you rap with all filler and I'm ?sure? the crickets and fireflies
Don't try to dispute we shoot straight and rarely miss
and go anywhere we wish
but MCs comin' up who can barely piss
Watch what you say
Watch how you think
Watch how you act[Mad Child]
Fire in the hole stare into the glare
the flare rips your retina no way to prepare
for combat cock is sharp a Autobot
brain cells bust lines laced with angel-dust
X-factor, X-men declare war
Send your ambassador
Send the whole peace core
North-shore carnivore attacks and concords
Mutant assassins, and silent saboteurs
Let me take a stab at your track rewind it back
Select or access code is hacked

Rock steady reinforcement enhanced advancement
Audiences senses audio transmit
Thunderous Thor strikes with Mjolnir
Hard rock like Thing from fantastic four
Prune beneath the moon lit rips solar eclipse
Madchild flips like kids on acid trips[Unicron]Unicaron formin' a union on, and loomin' on
tracks by Dell just boomin on
Quality systems all of these tracks we can't list em,
ditch em, fuck em, reluctant to kick old shit
quick to fold it like the narrows wearing sombreros????? ?????? ?????
blowing roofs on Winnebagos with bitches underneath the stagecoach
age old definition of pimping, 18A,it's a raping in the date game that they may change
in break dames at the high speed make them want to try me
but never give my keys, its highly unlikely
slice me as being forward, walk by us shy, call her, holler at me fool
that's a cool sack but you can't loose black too fast
straight from the town and down the prove that but you knew that
you remember how we do that, you WACK as FUCK
Unicron we rockin shit, let your mama know that, bitch
Heiroyglyphics[Prevail]
I'm the unread lock corner storming professor X
my neural networks best like what works
lets first analyze the 21 gun sound
then realize that if it's stereo I won't be surrounded
Astounded and amazed praise like two common
I have nothing in common with the layman
and the plane I shake magic like a shaman on a red clay plate
I'm uncommon and way beyond Darwin
The ultimate test of aptitude is my universal appetite of altitude
Simpletons terms you climb when I rhyme
Newton's apple had worms
but there's a killer on the road
so you should read the signs
come to terms with the modern man of clarity
an MC of rarity truly a rhyme odyssey
God will see im an oddity and eventually pardon me,
if you'd be angels where fools fit a tread in they only see my back cause I'm three steps ahead of them
look at em dead in the eye
theyre as crooked as a cloud in the sky
well I'm the who, what, why, where, when of sewer rats multiply
more plagues will descend
I wore like the kin like they wore like Lord Shin
(What you tryin to say Prev)
Yo let me try this again
As high as we ascend I wont break or bend

my soul was carried by the crow but delivered by the wren,
keep my blade like samurai, speak wise words like zen
after science experiments I prevail ??? (as wind?)
