Gone

Pearl Jam

No more upset mornings
No more trying evenings
This American Dream I am disbelieving
When the gas in my tank feels like money in the bank
Gonna blow it all this time, take me one last ride
Oh the lights of the city, they only look good when I?m speeding
I wanna leave em all behind me cause this time I?m gone
Gone, going for it all this time, gone (?)
Going gone this time I am gone (?)
So long this time I'm gone
In the far off distance
As my taillights fade
No one to witness but they will someday
Feel like a question is forming

And the answers far
I will be what I could be
Once I get out of this town
For the lights of this city
They have lost all feeling
Gonna leave em all behind me because this time I?m gone
Gone, you're gone yeah this time I haven't gone at all
So long, long gone, I haven't gone at all
This time I'm gone
Nothing is everything
If nothing is everything then I will have it all
If nothing is everything then I will have it all
I?m...I am gone
