

# We Rock It (feat. Dev)

Sander Kleinenberg

We rock it

We rock it

We rock it

It's Sunday night, it's Monday morning

I give you warning that I might have to board this flight, flight

Just to board it cause life is boring and I might be snoring

But I'll still pour this drink up, up, and then destroy it

If you drive it, floor it, if you hide it, store it

Cause I'll find it and I'll take it, and I won't ignore it

That I'm creating what you're imitating

Bitch, calm down, you know my situation

We rock it

We rock it

We rock it all night

We rock it

We rock it

We rock it all night

I need a drink, and a late night dream, but watch out

I place my own team, I shoot with my own gun

Throw it away and find another one

When I hit the club, I need head room so I can turn the dance floor into my bedroom

I got a sweet tooth for brandy, I like strangers with candy

My policy is privacy, in the driver's seat

I'd probably let you in my property, but that don't mean monogamy

No, there's no stopping me, I like to play Monopoly

As long as you keep watching me, flocking to me and talking to me

We rock it

We rock it

We rock it all night

We rock it

We rock it

We rock it all night

We rock it

We rock it

We rock it all night

We rock it

We rock it

We rock it all night

It feels so right, it must be wrong

Please excuse me while I rock you all night long, all night long

When I go left, you go right

You and me on track, we rock it all night

All night long, all night long

You and me on track, we rock it all night

All night long, all night long

You and me on track, we rock it all night

We rock it

We rock it

We rock it all night

We rock it

We rock it

We rock it all night

We rock it

We rock it

We rock it all night

We rock it

We rock it

We rock it all night
