# When There's Love

## Keith Green

Take some time, make a friend of a stranger
Touch a hand, just reach out, there's no dangerWhen there's love, mountains move
The blind can see and things improve
Don't be afraid to take the lead
And be the first to plant a seed
And then just watch it grow, don't you know that nowTake some time, tell someone that you love 'em
Make them feel there's a rainbow above 'emWhen there's love, storms will cease
And those in chains will be released
There's not a thing that love can't do
But it's got to start with me and you
And then just watch it grow, don't you know, know, know, knowWhen there's love, you can't lose
You'll always know which road to choose
There's not one thing that love can't do
But it's got to start with me and you
And then just watch it grow, don't you know, know, know, know, knowTake some time, make a friend of a stranger
When there's love touch a hand, just reach out, there's no danger
When there's love, take the time, make a friend of a stranger
When there's love, touch a hand, just reach out, there's no dangerWhen there's love, take the time, make a friend of a stranger
When there's love, touch a hand, just reach out, there's no danger
