This Is All We Know

Number One Gun

The understanding of your heart
Leads to the meaning of it all
To pretend I really know
Well, that would hurt so badTonight it feels so right
Cause this is all we know
And I will say goodbye
Cause this is all we know
And this is all we knowRemember the times we used to have
Well I won't forget them
I've heard that before
Whatever it was you said
I need more
