

We Are Chemical

The Motorleague

I've been searching for clarity,
Why is it so hard to find?
It's the words I can't say,
It's the price I will pay but,
Maybe it's all in my mind

Now it's time to set you free
I can never let go,
It's the choice I can't make
It's the vice I can't break but,
I guess I'll never know

(Chorus)

We are chemical
Cancelling each other out
We are variables
We are lost within ourselves
We are chemical
Cancelling each other out
We are chemical

I've been digging a shallow grave
It's so hard to cut through
It's the sounds of the weak that we don't like to speak but
They mean something to you

And I've been trying to cut you off
I can't see through the pain
Suffice it to say it won't be today 'cause
I'll do it again

(Chorus)

We are chemical
Cancelling each other out
We are variables
We are lost within ourselves
We are chemical
Cancelling each other out
We are chemical

(And I've got substance in my veins)
(I won't let anything go)

And I've got substance in my veins
I can't let anything escape
And I've got substance in my veins
I can't let anything go

And I've got substance in my veins
I can't let anything escape
And I've got substance in my veins
I can't let anything go

We are chemical
Cancelling each other out
We are variables
We are lost within ourselves
We are chemical
Cancelling each other out
We are variables
We are lost within ourselves

We are chemical
We are chemical
We are chemical
We are chemical
