

# Hold On To Your Mind

[Ian Thompson](#)

Lasers and holograms and digital audio sounds  
production line robots wasting people saving pounds  
I've got a friend whose fighting  
to save the whale the trees the skies  
you've got to hold on to your mind hold on to your mind  
Recession depression the cog still turns the wheel  
the plastic exploded now you're paying it for real  
I met a girl a sociological dame who wanted my brain  
you've got to hold on to your mind hold on to your mind  
you know it ain't right but I'll keep on fighting  
I'll fight the good fight  
don't ask myself why it's just the blind leading the blind  
you've got to hold on to your mind  
you've got to hold on hold hold  
you've got to hold on hold hold  
now sex is a drug for sale a thousand different ways  
and if you're a prude that hasn't screwed it's just a phase  
they say it's the best but don't turn your head  
from good like all the rest  
my friend please hold on to your mind hold on to your mind  
please hold on to your mind you know you're just a human kind hold on don't fall hold on don't fall hold on  
don't fall hold on don't fall
