

3'z My Lucky Number

Mest

the one that I want is gone
and the two I never had are back
but I'll give up everything with those two
just to have the one that I had back
because...you don't know what you got until it's gone
and with those two it's been way to long
to try and respark any flames I ever had
and it makes me sad to think that everything I wanted back then
is coming back to me now 3'z my lucky number but I think I'm goin' down
I think I'm gonna' crumble with all these people around
they were the one's that tore me up and threw me out
but I'm a stronger person now I wont go that route
because...you don't know what you got until it's gone
and with those two it's been way to long
to try and respark any flames I ever had
and it makes me sad to think that everything I wanted back then
is coming back to me now
back to me now...you don't know what you got until it's gone
and with those two it's been way to long
to try and respark any flames I ever had
and it makes me sad to think that everything I wanted back then
is coming back to me now
back to me now...3'z my lucky number but I think I'm goin' down
I think I'm gonna' crumble with all these people around
they were the one's that tore me up and threw me out
but I'm a stronger person now I wont go that route
because...you don't know what you got until it's gone
and with those two it's been way to long
to try and respark any flames I ever had
and it makes me sad to think that everything I wanted back then
is coming back to me now
back to me now...
