

# Never Believe

## Ministry

Is anybody here?  
Is everybody here?  
The service is about to begin I make my servant by fires insidious  
Instead of the laughter there's the last of the separated jewels  
I'll make dust of the whole damned wall  
I'll make hovels for all the worms  
I left off my hands to save these idiot bastards, bastards Me and my cell mate have lost again for ever  
The sun shines and I breathe 'My father'  
I want so much to remove your past  
And deliver your neurotic flesh from evil Grab this giant's hand  
Grab this giant's hand  
Grab this giant's hand  
Grab this giant's hand But I'm only allowed to touch what I know  
And all that I know are hypocrites  
Liars and witches who burned  
In the name of human fear You will never believe, never believe  
Never believe, never believe  
Never believe, never believe  
Never believe, never believe We haven't much time left Evening will come and with it the equivalent  
Of the devil's animals with fear to come  
They ask of us favors we cannot fulfill  
They ask, curse at us and we smile Caught in conviction  
A crowd of senseless individuals  
Will go further than both love and greed  
As the clear salvation, the future is here You will never believe, never believe  
Never believe, never believe  
Never believe, never believe  
Never believe, never believe
