

# Bloody Mary

## Gwar

Ice world, eternal night  
Doors are chained and barred  
Toiling slaves die in droves  
This life is hard There's a Balrog in the woodpile  
In the corner, dead canary  
Going down to the dungeon  
To see my Bloody Mary Bloody Mary, pretty scary  
She knows what to do  
With the bone I gotta bury  
Bloody Mary, she's from the surface world Bloody Mary, slutty very  
She used to shave her pussy  
Now it's getting pretty hairy  
Bloody Mary, she's an American girl Torches, chains  
Sweaty, straining flesh  
The womb explodes  
In a meat-maggot mesh The mutant we made  
Was really beautiful, baby  
We fingered and felched it  
Then sprayed it with rabies Bloody Mary, pretty scary  
She knows what to do  
With the bone I gotta bury  
Bloody Mary, she's from the surface world Bloody Mary, slutty very  
I treat my girlfriends  
Even better than Chuck Berry  
Bloody Mary, she's an American girl Oh Bloody, Bloody Mary  
Your lips are turgid, your ass is cherry  
I'll never, never let you die  
Bloody, Bloody  
The women bleeds but does not die? When you are immortal  
The space of many years  
Seems just as little  
As the weight of her tears That she cried as she waited  
As the worms, they ate her brain  
I had her animated  
But you know it's not the same Bloody Mary, pretty scary  
She knows what to do  
With the bone I gotta bury  
Bloody Mary, she's from the surface world Bloody Mary, fucking scary  
She knows what to do

With the bone I gotta bury  
Bloody Mary, she's an American girlShe's an American girl  
She's an American girl  
In an Antartican world  
Nothing but death there for you
