

# Knowing She's There

[Dr. Hook](#)

Knowing she's there  
Makes it possible to live  
Knowing she's there  
Giving all she's got to give And when the road got long  
And the load got heavier  
She'd whisper, "Babe, I'm right here with ya"  
And made it easier to bear, knowing she's there Knowing she's there  
When I reach out in my sleep  
Knowing she's there  
To hold me when I'm weak And when the nights got cold  
And the days got drearier  
She'd whisper, "Babe, I'm right here with ya"  
And made it easier to bear, knowing she's there Why did it make me take the lady's love for granted?  
How could I live so deep in a woman and never notice a change?  
Why doesn't any love ever go the way you planned it?  
And why doesn't any woman ever stay the same? Now knowing she's there  
Instead of being here with me  
Just knowing she's there  
Giving him what she gave me And it ain't that I can't live without it  
But every time I think about it  
Something inside me screams, something inside me burns  
I feel something inside me tear, knowing she's there
