

I Get Along

Pet Shop Boys

Feeling like Im stuck in a hole
Body and soul, while youre out of control
Now I know why you had to go
Well, I think we both know why it had to be so Ive been trying not to cry
When Im in the public eye
Stuck here with the shame
And taking my share of the blame
While making sudden plans
That dont include you I get along, get along
Without you very well
I get along very well Now I know youd much rather be
With rock royalty instead of someone like me
The big boys are back And we need them, you said
Think it was something youd read
And it stuck in your head Even though I dont suppose
Thats as far as it goes
Youve got quite an appetite
For being wronged and in the right
Well, from now on it wont affect me I get along, get along
Without you very well
I get along very well The morning after the night before
Id been alerted to your lies
I phoned you up, your calls were all diverted
Took a long time to track you down Even then you were defiant
Its not what you think it is, you said
And proceeded to deny it So I lost my patience at last
And it happened so fast
You belong in the past Ive been trying not to cry
When Im in the public eye
Stuck here with the shame
And taking my share of the blame
While making sudden plans
That dont include you I get along, get along
Without you very well
I get along very well
