You And Me And One Spotlight

Yellowcard

It wont be long now
The musics on loud
Well sing this song out
And then we'll lie downIll hold you close then
And let you know when
The space and time bend
And then well fall inGo put on your best tonight
Its you and me and one spotlight
One more show, one last time
We are readySay you will be all around me
When your body sets your heart free
Say you will be all around meIll look for your eyes
To keep me inside
When everything dies
But one last sunriseAnd when we stand there
Together, not scared
Ill dry your last tear
And then we'll just [Incomprehensible]Go put on your best tonight
Its you and me and not much time
So watch the world burning bright
We are readySay you will be all around me
When your body sets your heart free
Say you will be all around meSay youll guide me before the ending
Take my body, set my heart free
Say youll get me before the endingGo put on your best tonight
Its you and me and one spotlight
One more show, one last time
It wont be long nowSay you will be all around me
When your body sets your heart free
Say you will be all around meSay youll guide me before the ending
Take my body, set my heart free
Say youll get me before the endingSay you will be
You wont be long
All around me
You wont be long now
