Lights Out

Bodyjar

Pain awayIt's getting too hard to know
If you're made a connection
Tell me how far you go when
You're starved for affectionYou're gonna break soon
Locked in the bathroom
With all the lights out
Wait for the come down
You got your own life
You better start todayI know there's something I can do
To take the pain awayLiving from day to day
With the wrong information
But you only talk to me
When you're under sedationYou're on the wrong side
You gotta fight more
Not just a phone call
Something to live for
You got your own life
But there's a price to payI hope there's something I can do
To take the pain awayYou cry out but they never listen
Nothing I can do to take the pain away
