

Disappearer

Radar Bros.

And here it comes again, right out of the rain
Seems to have a new, kind of same
Been it playing on a simple rhyme
The sign comes alive and speaks the mind It turns to me and it turns to gold
It turns to see, the fast lane slow It's been away too long
It's been away, I'm gone
It is coasting on
To the west star Looking out I thought I saw it blink
Coming on to me like a silver eye
Pick it up and turn it on and
Head on out to a western starland It's been mad and gone
Now it's a singing song
Like a western star
It's going my way Looking out I'm back in time to stay
Into the eastern side of way
It comes alive through and clearer
Ghost arise into a mirror You've been away too long
It's been way too long
An eastern star is on
A disappearer
