

Camouflesh

Cut Up

Ravaging through the human flesh to clean out the inside
Removing all intestines, muscles, pulverized bones and tendons
Cut the neck wide open to rip out the brainExhuming the entrailsAll remaining word now is to swab up all the
blood
To carve the last nerves from the skin
Remove all the nails and rip out the eyesSmell the slaughter
Inhale the fumes of autopsy
The cadaver starts to shape into my camoufleshExhuming the entrailsWhen preparations are done, crawl inside
the empty carcass
The shiny skin is stitched to fit, standing in a cold pile of gore
A hideous morbid mirror image staring back
Smell the slaughter - inhale the fumes of autopsy
The cadaver starts to shape into my camouflesh
Desecrated cut up human - eviscerated guts
The cadaver starts to shape into my camouflesh
