

Someone Anyone

Anberlin

Thought we were past this
Thought we moved on
But I guess I was wrong
Do we not learn from mistakes?
Do we not have what it takes?
Are you the cure or disease?
Do you still take as you please
Are you the cure? Or are you the disease? Someone, someone tell me what were fighting for
Anyone, anyone, anyone can start a war
No one can walk away, no one can walk away truly alive
Someone, someone, someone tell me why we need this?
Anyone, anyone, anyone can start a war
No one can walk away, no one can walk away truly alive Forward we find, yesterdays gone
And I hope that Im wrong
If we dont learn from their past
Well repeat their history oh at last Are you with us or without?
Scene is set but fading out
Are with us, well are you with us? Someone, someone tell me what were fighting for
Anyone, anyone, anyone can start a war
No one can walk away, no one can walk away truly alive
Someone, someone, someone tell me why we need it?
Anyone, anyone, anyone can start a war
No one can walk away, no one can walk away truly alive Are you the cure or disease?
Do you still take as you please
Are you the cure? Or are you the disease? Someone, someone tell me what were fighting for
Anyone, anyone, anyone can start a war
No one can walk away, no one can walk away truly alive, truly alive Someone, someone tell me what were
fighting for
Anyone, anyone, anyone can start a war
No one can walk away, no one can walk away truly alive
Someone, someone, someone tell me why we need it? I dont see a reason, tell me why we need a reason
