

# Look What I Found

## Pepper

Advisory - the following lyrics contain explicit language:

Look what I found in Kona Town  
While the sky gets weary and the sun goes down  
It's summer living, oh it's the season  
To get your body naked and then start screaming  
Around the clock 'cause we don't stop  
Ya 'gotta keep it moving like a porno plot  
All the drinks to fix ya, it's a perfect mixture  
You lean to the side to get a clearer picture  
I know, yes I know that I have played the fool  
I know, yes I know I'm so lonely because of you  
Here come the night, don't forget to invite  
All those girls with a horny appetite  
Now, get risky on a holiday  
What's the sense of working hard if you never get to play?  
So, give a luck with no politics  
Turn yourself into an X rated lunatic  
I like it daring, I keep on staring  
Got my eyes focused on the skirt she's wearing  
I know, yes I know that I have played the fool  
I know, yes I know I'm so lonely because of you, are you?  
Heated evening starts to escalate  
Rolling on and on till we evaporate  
And I've been missing, oh I've been missing  
The way your body moves in those late night positions  
I hit repeat on Arena beats  
Make my way through the crowd in the summer heat  
The house is shaking, furniture is breaking  
Wake up in the morning with your body aching  
I know, yes I know that I have played the fool  
I know, yes I know, that I'm so lonely because of you  
I know, yes I know that you've been lonely too
