

Right Where I Belong

3 Doors Down

There's a difference in spending time with me
And killing time while I'm there
On too many people and too many things
And it makes me feel like hell
You're half gone as I can see
And all of this she says to me There's too many questions
And too many strings
And they won't keep their self tied
On a roller coaster ride
It feels like I'm lying next to a ghost at night I don't know why I gave you my heart
'Cause sometimes it feels so wrong
But in spite of all this weather
I know why we are together
And I swear right now
I'm right where I belong I know I get a little bit crazy
But I've never done you no wrong
I get distracted and carried away
And it's been this way too long
I don't know what you need from me
'Cause all I know is what I can see There's too many questions
And too many strings
And they won't keep their self tied
On a roller coaster ride
It feels like I'm lying next to a ghost at night I don't know why I gave you my heart
'cause sometimes it feels so wrong
In spite of all this weather
I know why we are together
And I swear right now
I'm right where I belong
I'm right where I belong
Go on, play it for me son There's too many questions
And too many strings
And they won't keep their self tied
On a roller coaster ride
It feels like I'm lying next to a ghost at night I don't know why I gave you my heart
'Cause sometimes it feels so wrong
In spite of all this weather
I know why we are together
And I swear right now

I'm right where I belong
