

# Lightning Bugs and Rain

Whiskey Myers

There's a special place nobody knows  
Way up on the hill  
Where the moon shines through the tall pines  
And the whole damn world stands still  
I'm gonna take you there where you can't be found  
Put a blanket down and [?] There ain't nothing on this mountain but us, lightning bugs and rain  
Girl I think I love  
you  
Barefoot and soaking wet  
You're the prettiest thing this mountain's ever seen  
A picture I can't forget  
With your sparkling eyes and these fireflies  
A river in a frame  
There ain't nothing on this mountain but us, lightning bugs and rain  
Never saw the view from here get any better  
But you're dancing 'round the fire  
Like you control the weather  
And here in the clouds  
There's a storm on the way  
There ain't nothing on this mountain but us, lightning bugs and rain  
There's a special place nobody knows  
Way up on the hill  
That's where we'll make our babies  
In that Cadillac De Ville  
And we'll sit out on the porch  
Just growing old  
Giving all the stars new names  
There ain't nothing on this mountain but us, lightning bugs and rain  
Lightning bugs and rain
