Anybody

Travis Garland

Lady Godiva
I ain't never met a girl like you, not like you
You take me higher and when I fall you're my parachute
Yes you
Cause I'm feeling like you're so sexy, you're so crazy
I ain't met no one like you lately
Time flies by and I don't notice when I'm with you
And you ain't drama you ain't tripping
Other girls talk but you just listen
You're so special, don't know anybody like you, oh
[Chorus]Nobody's perfect, but you just might prove me wrong
Well I guess you're not just anybody, anybody
Look past the surface and you're still beautiful
Well I guess you're not just anybody, anybody
My Mona Lisa, you just might be one of a kind, you're so rare.
I'd fly to meet ya, London, Paris, Rome girl, I will go
If you're there
'Cause I'm feeling like you're so sexy, you're so crazy
I ain't met no one like you baby
Time flies by it and I don't notice when I'm with you
And you ain't drama, you ain't tripping
Other girls talk but you just listen
You're so special, don't know anybody like you

[Chorus]Nobody's perfect, but you just might prove me wrong
Well I guess you're not just anybody, anybody
Look past the surface and you're still beautiful
Well I guess you're not just anybody, anybody
[Talking]I just want you to know, that if all that was left of you was your smile and your little finger
You'd still be more of a man than everyone I have ever met
That's because you know what I've been doing, my little finger
I have no idea.
But you are aching to find out.
You had me there, you can have me anywhere.
Does that mean this mean that you ... ? Yeah that's how I described it , I'm a freaking complicated woman
I have something to be afraid of, what is there left of me, whatever I am,
I'm yours
[Chorus]Nobody's perfect, but you just might prove me wrong
Well I guess you're not just anybody, anybody

Look past the surface and you're still beautiful
Well I guess you're not just anybody, anybody
Nobody's perfect, but you just might prove me wrong
Well I guess you're not just anybody, anybody
Look past the surface and you're still beautiful
Well I guess you're not just anybody, anybody
