

The Enemy Within

Carrier Flux

Sky turned black and burning fast
Clouds drowned out with blood
Engulfed, enraged, in pain
We join hands join scars with earth
Skipped the flesh and drowned with death
entombed by the cancer we create
stripped of breath but dreaming we are still
forced to tread the path we've made
encouraged by tears of waste
Improve, Inject, Advance
Progress, Refine - Destroy
Our reign relieved
The pure now lie in our place
We phased out all conscious reserve
Our eyes closed we now learn to run
