

Sister Moon

Gotthard

Sister moon, come lead me down
to rest my weary head
I walked a million miles, along
the road of no regret I've been a fool, messed
around...
a lock without a key
I'm waiting for the
morning sun
to make it shine on me So long, lonely days
take me back where I
belong
All gone, it's all behind
Hope you don't mind, hope you don't mind,
hope you don't mind too many times I lost the grip
was worn out on the floor
Fallen angel, don't lose your wings
'cause you'll never fly
no more
